1. Record Nr.	UNINA9910337786603321
Titolo	The Art of Structuring : Bridging the Gap Between Information Systems Research and Practice / / edited by Katrin Bergener, Michael Räckers, Armin Stein
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-06234-1
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (535 pages)
Disciplina	658.4038
Soggetti	Management information systems
	Application software
	Industrial management
	Business Information Systems
	Information Systems Applications (incl. Internet)
	Business Process Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part I: Visions -- Part II: Models -- Part 3: Processes -- Part IV: Data -- Part V: Organizations -- Part VI Technologies.
Sommario/riassunto	Structuring, or, as it is referred to in the title of this book, the art of structuring, is one of the core elements in the discipline of Information Systems. While the world is becoming increasingly complex, and a growing number of disciplines are evolving to help make it a better place, structure is what is needed in order to understand and combine the various perspectives and approaches involved. Structure is the essential component that allows us to bridge the gaps between these different worlds, and offers a medium for communication and exchange. The contributions in this book build these bridges, which are vital in order to communicate between different worlds of thought and methodology – be it between Information Systems (IS) research and practice, or between IS research and other research disciplines. They describe how structuring can be and should be done so as to foster communication and collaboration. The topics covered reflect various

layers of structure that can serve as bridges: models, processes, data, organizations, and technologies. In turn, these aspects are complemented by visionary outlooks on how structure influences the field.
