

1. Record Nr.	UNINA9910337841603321
Titolo	Advanced Hybrid Information Processing : Second EAI International Conference, ADHIP 2018, Yiyang, China, October 5-6, 2018, Proceedings // edited by Shuai Liu, Gelan Yang
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-19086-2
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XVI, 594 p. 303 illus., 158 illus. in color.)
Collana	Lecture Notes of the Institute for Computer Sciences, Social Informatics and Telecommunications Engineering, , 1867-8211 ; ; 279
Disciplina	004 006.3
Soggetti	Artificial intelligence Computer communication systems Computer system failures Computers Artificial Intelligence Computer Communication Networks System Performance and Evaluation Information Systems and Communication Service
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Robust Sparse Image Recovery in Impulsive Noise via ADMM Algorithm -- Research on the New Mode of Undergraduates' Innovation and Entrepreneurship Education under the Background of 'Internet Plus' -- Automatic Summarization Generation Technology of Network Document Based on Knowledge Graph -- Research on Two-dimensional Code Packaging Advertising and Anti-counterfeiting Based on Blockchain -- An improved human action recognition method based on 3D convolutional neural network -- Multi-user ALE for Future HF Radio Communication by Leveraging Wideband Spectrum Sensing and Channel Prediction -- SDN Dynamic Access Control Scheme Based on Prediction -- A Single Source Point Detection Algorithm for Underdetermined Blind Source Separation problem -- Identification and

Elimination of Abnormal Information in Electromagnetic Spectrum  
Cognition -- Design and Implementation of Pedestrian Detection  
System -- Overlapped Signal Separation Research Based on Infomax  
Extension -- Real-time monitoring technology of potato pests and  
diseases in northern Shaanxi based on hyperspectral data -- Multi-  
mode Retrieval Method for Big Data of Economic Time Series Based on  
Machine Learning Theory -- Research on Parallel Forecasting Model of  
Short-term Power Load Big Data -- Approximate Data Fusion Algorithm  
for Internet of Things Based on Probability Distribution -- An adaptive  
threshold VIRE algorithm for indoor positioning -- Two-dimensional  
super-resolution direction finding algorithm for wideband chirp signals  
-- Research on Data Synchronism Method in Heterogeneous Database  
Based on Web Service -- Automatic calibration system of English lesson  
plan information under big data analysis -- Design of intelligent  
driving system for variable speed vehicle based on big data analysis --  
Multi-mode Retrieval Method for Big Data of Economic Time Series  
Based on Machine Learning Theory -- Research on Trend Analysis  
Model of Movement Features Based on Big Data -- Research and  
Analysis on Comparison Scheme of IoT Encrypted Data in Cloud  
Computing Environment -- DDoS attack detection based on RBFNN in  
SDN -- A Speed-up K-Nearest Neighbor Classification Algorithm for  
Trojan Detection -- A method of estimating number of signal with  
small snapshots -- A Large-scale Image Retrieval Method Based on  
Image Elimination Technology and Supervised Kernel Hash -- An  
Improved Eigenvalue-Based Channelized Sub-band Spectrum Detection  
Method -- Research on Secure Storage of Multimedia Data Based on  
Block Chaining Technology -- Research on Accurate Extraction  
Algorithm for Fault Signal Characteristics of Mechanical Rolling  
Bearings -- Hybrid manipulator running trajectory prediction algorithm  
based on PLC fuzzy control -- Construction of Design Characteristics  
Model of Manufacturing Structures for Complex Mechanical Parts --  
UAV-enabled Wireless Power Transfer for Mobile Users: Trajectory  
Optimization and Power Allocation -- Manufacturing-Oriented Network  
Collaboration 3D Mechanical Components Rapid Design Technology --  
Parallel Implementation and Optimization of a hybrid Data Assimilation  
Algorithm -- Research on Vectorization Method of complex linear  
image data -- Automatic calibration system of English lesson plan  
information under big data analysis -- Research on Data Synchronism  
Method in Heterogeneous Database Based on Web Service -- Research  
on Parallel Forecasting Model of Short-term Power Load Big Data --  
Design of intelligent driving system for variable speed vehicle based on  
big data analysis -- Research on Vectorization Method of complex  
linear image data -- Research on Trend Analysis Model of Movement  
Features Based on Big Data -- Research and Analysis on Comparison  
Scheme of IoT Encrypted Data in Cloud Computing Environment --  
Modeling Analysis of Intelligent Logistics Distribution Path of  
Agricultural Products under Internet of Things Environment --  
Intelligent fusion technology of crop growth monitoring data under  
wireless sensor networks -- A QA System Based on Bidirectional LSTM  
with Text Similarity Calculation Model -- Channel Estimation for  
MmWave Massive MIMO via Phase Retrieval -- Interactive design of Web  
user interface adaptive display -- Method for Quickly Obtaining User  
Browsing Behavior Data Under Cloud Computing -- Precipitation  
Prediction based on KPCA Particle Swarm Support Vector Machine  
Optimization -- Communication Interference Evaluation -- The Physical  
Layer Identification of Communication Devices Based on RF-DNA --  
Research on Nonlinear Modeling For RF Power Amplifier -- High  
precision detection system of circuit board based on image location --

Modulation recognition technology of communication signals based on density clustering and sample reconstruction -- A Target Localization Algorithm for Wireless Sensor Network Based on Compressed Sensing -- A News Text Clustering Method Based on Similarity of Text Labels -- Background Error Propagation Model based RDO for Coding Surveillance and Conference -- Videos -- A Stereo Matching Algorithm for Vehicle Binocular System -- Study on Civil Aviation Unsafe Incident Prediction Based on Markov Optimization -- Risk Assessment on Vertical Collision of Paired-approach to Closely Spaced Parallel Runways -- A Fine-grained Detection Mechanism for SDN Rule Collision -- Source Encryption Scheme in SDN Southbound -- Inter-frame tamper forensic algorithm based on structural similarity mean v.

---

Sommario/riassunto

This book constitutes the refereed proceedings of the Second EAI International Conference on Advanced Hybrid Information Processing, ADHIP 2018, held in Yiyang, China, in October 2018. The 71 papers presented were selected from 228 submissions and focus on hybrid big data processing. Since information processing has acted as an important research domain in science and technology today, it is the right time to develop deeper and wider use of hybrid information processing, especially information processing for big data. There are more remaining issues waiting for solving, such as classification and systemization of big data, objective tracking and behavior understanding in big multimedia data, encoding and compression of big data.
