"El Barrio es de Todos": Predicaments of Culture and Place -- 3. Empowered Culture? The Empowerment Zone and the Selling of El Barrio -- 4. The Edison Project: On Corporate Headquarters, Museums, and the Education of El Barrio -- 5. The Mexican Barrio: Mexicans, Puerto Ricans, and the Terrain of Latinidad -- 6. The Marketable Neighborhood: Outdoor Ads Meet Street Art -- Some Final Words -- Notes -- References -- Index
Sommario/riassunto	Arlene Dávila brilliantly considers the cultural politics of urban space in this lively exploration of Puerto Rican and Latino experience in New

York, the global center of culture and consumption, where Latinos are now the biggest minority group. Analyzing the simultaneous gentrification and Latinization of what is known as El Barrio or Spanish Harlem, Barrio Dreams makes a compelling case that-despite neoliberalism's race-and ethnicity-free tenets-dreams of economic empowerment are never devoid of distinct racial and ethnic considerations. Dávila scrutinizes dramatic shifts in housing, the growth of charter schools, and the enactment of Empowerment Zone legislation that promises upward mobility and empowerment while shutting out many longtime residents. Foregrounding privatization and consumption, she offers an innovative look at the marketing of Latino space. She emphasizes class among Latinos while touching on black-Latino and Mexican-Puerto Rican relations. Providing a unique multifaceted view of the place of Latinos in the changing urban landscape, Barrio Dreams is one of the most nuanced and original examinations of the complex social and economic forces shaping our cities today.

Sommario/riassunto	<p>This book constitutes the refereed proceedings of the 17th International Symposium on Web and Wireless Geographical Information Systems, W2GIS 2019, held in Kyoto, Japan, in May 2019. The 10 full papers included in the volume together with a keynote paper and 3 work-in-progress papers were carefully reviewed and selected from 37 submissions. The papers discuss advances in theoretical, technical, and practical issues in the field of wireless and Internet technologies suited for the dissemination, usage, and processing of geo-referenced data. They cover topics such as Web technologies and techniques, paths and navigation, Web visualization, and novel applications.</p>
