| Nota di contenuto       | On Analyzing Motion Data -- Deep Learning on Image and Shape Data -- 2D and 3D Pattern Classification -- Watermarking, Segmentation and Deformations.                                                                                                                                                                                                                                                                                                                                                                                          |
| Sommario/riassunto      | This book constitutes the refereed proceedings of the 7th International Workshop on Representations, Analysis and Recognition of Shape and Motion from Imaging Data, RFMI 2017, held in Savoi, France, in December 2017. The 8 revised full papers and 9 revised short papers presented were carefully reviewed and selected from 23 submissions. The papers are organized in topical sections on analyzing motion data; deep learning on image and shape data; 2D and 3D pattern classification; watermarking, segmentation and deformations. |
