Note generali	Includes index.
Sommario/riassunto	This book constitutes the refereed proceedings of the IFIP WG 8.6 International Working Conference "Smart Working, Living and Organising" on Transfer and Diffusion of IT, TDIT 2018, held in

Portsmouth, UK, in June 2018. The 17 revised full papers and 2 short papers presented were carefully reviewed and selected from 34 submissions. They deal with the adoption of new classes of technology used by individuals, organisations, sectors and society with a particular focus on how emerging technologies are adopted and appropriated in organisations and everyday life and their impact. The papers are organized in the following topical sections: being smart: adoption challenges; sharing economy and social media; government and infrastructure; IT project management; and revisiting concepts and theories.
