

1. Record Nr.	UNINA9910337877503321
Autore	Schirmmacher Arne
Titolo	Establishing Quantum Physics in Göttingen : David Hilbert, Max Born, and Peter Debye in Context, 1900-1926 / / by Arne Schirmmacher
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-22727-8
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (128 pages)
Collana	SpringerBriefs in History of Science and Technology, , 2211-4564
Disciplina	530.12 530.12072
Soggetti	Physics Quantum theory History History and Philosophical Foundations of Physics Quantum Physics History of Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Situating Göttingen in the History of Quantum Physics: A Contextual Approach -- From Generational Change to Scientific Opportunity -- "Hilbert and Physics" — Vision and Resources -- The Born "Schools" in Berlin, Frankfurt and Göttingen -- Göttingen's Multiple Avenues Towards Quantum Mechanics -- Appendix: Selected Documents. .
Sommario/riassunto	Quantum mechanics – the grandiose theory that describes nature down to the submicroscopic level – was first formulated in Göttingen in 1925. How did this come about and why is it that Göttingen became the pre-eminent location for a revolution in physics? This book is the first to investigate the wide range of factors that were pivotal for quantum physics to be established in Göttingen. These include the process of generational change of physics professors, the hopes of mathematicians seeking new fields of research, and a new understanding of the interplay of experiment, theory and philosophy.
