

1. Record Nr.	UNINA9910337887603321
Titolo	Exploring the Nexus of Geoecology, Geography, Geoarcheology and Geotourism: Advances and Applications for Sustainable Development in Environmental Sciences and Agroforestry Research : Proceedings of the 1st Springer Conference of the Arabian Journal of Geosciences (CAJG-1), Tunisia 2018 // edited by Haroun Chenchouni, Ezzoura Errami, Fernando Rocha, Luisa Sabato
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-01683-8
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (112 pages)
Collana	Advances in Science, Technology & Innovation, IEREK Interdisciplinary Series for Sustainable Development, , 2522-8714
Disciplina	550
Soggetti	Environmental geography Environmental engineering Biotechnology Historical geology Geomorphology Agriculture Plant ecology Environmental Geography Environmental Engineering/Biotechnology Historical Geology Plant Ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Environmental Assessment and Monitoring of Agrisilvicultural Systems -- Environmental Impacts and Restoration Ecology of Natural and Agricultural Habitats -- Investigations and Applications in Environmental Biotechnology -- Spatiotemporal Patterns of Marine Biodiversity and Terrestrial Paleobiodiversity -- Socio-economics of Geotourism and Archaeology.

This edited volume is based on the best papers accepted for presentation during the 1st Springer Conference of the Arabian Journal of Geosciences (CAJG-1), Tunisia 2018. The book is of interest to all researchers in the fields of Environmental Sciences, Geoecology, Agroforestry, Geography, Geoarcheology and Geotourism. The Mediterranean Basin, Middle East and surrounding regions are ecologically unique due to large differences in climatic, geographical, and geological features, which grant countries of these regions with significant socio-economic potentials in terms of fertile agricultural lands, rich natural resources, and the existence of strategic resources such as crude oil and natural gas. However, the valuation of ecosystem functions, goods and services of natural and cultural heritages and bioresources of these regions is still little known. This volume offers an overview of the latest information and ideas on the physical environment of these regions, assessment and monitoring of natural bioresources including flora and fauna, and the use of cutting-edge methods for the development of sustainable agricultural systems. It gives also new socio-economic insights on geotourism and archaeology. Main topics include: 1. Environmental Assessment and Monitoring of Agrisilvicultural Systems 2. Environmental Impacts and Restoration Ecology of Natural and Agricultural Habitats 3. Investigations and Applications in Environmental Biotechnology 4. Spatiotemporal Patterns of Marine Biodiversity and Terrestrial Paleobiodiversity 5. Socio-economics of Geotourism and Archaeology.
