

1. Record Nr.	UNINA9910337889203321
Titolo	Geomorphology of Georgia [[electronic resource] /] / edited by Levan Tielidze
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-77764-5
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XIII, 289 p. 157 illus. in color.)
Collana	Geography of the Physical Environment, , 2366-8865
Disciplina	551.41
Soggetti	Geomorphology Geology Geoecology Environmental geology Landscape ecology Physical geography Geophysics Geoecology/Natural Processes Landscape Ecology World Regional Geography (Continents, Countries, Regions) Geophysics/Geodesy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Part I: Introduction to the Geomorphological Landscapes and Landforms of Georgia -- Chapter 1. Long Term Geomorphological History of Georgia -- Chapter 2. Climate, hydrography and soils of Georgia -- Part II: Landscape Types of Georgia -- Chapter 3. Coastal (Abrasive) Landscape of Georgia -- Chapter 4. Karst Landscape of Georgia -- Chapter 5. Nival-Glacier Landscape of Georgia -- Chapter 6. Urban Landscape of Georgia (on the example of large cities) -- Part III: Main Landscapes and Landforms of Georgia -- Chapter 7. Morphological division of the Landscapes of Georgia -- Chapter 8. Western Greater Caucasus -- Chapter 9. Central Greater Caucasus -- Chapter 10. Eastern Greater Caucasus -- Chapter 11. Western Georgia (Kolkheti) -- Chapter 12. Eastern Georgia (Iveria) Lowland -- Chapter 13 Achara-

Trialeti-Loki mountainous -- Chapter 14. Volcanic Landscape of southern Georgia -- Part IV: Exogenic processes occurred in Georgia -- Chapter 15. General characteristics of exogenic processes.

Sommario/riassunto

This book provides a comprehensive overview of the geomorphology of Georgia. It describes a country characterized by geological, geomorphological and geographical diversities, located in the Caucasus region at the crossroads of Europe and Asia. This book is based on the results of several years of geomorphological studies and research in Georgia, published for the first time in English, and covers a gap in research in the field of world regional geomorphology. The landscapes of Georgia consist of high glacial mountains, medium and high mountains with deeply fragmented features, narrow and deep gorges and canyons, seaside lowlands, volcanic cones, uplands and mountain ranges, intermountain plains, hollows and highlands. The peculiarity of the landscape greatly affects the natural conditions. In several chapters, this book describes the diversity of climate, hydrographic network, vegetation cover, soils, fauna, exogenic processes, natural and anthropogenic landscapes. This volume provides the readers with the opportunity to explore the variety of landscapes and landforms in this diverse and fascinating country through informative texts illustrated with many color maps and photographs. Geomorphology of Georgia appeals to scientists, scholars, teachers and any readers interested in geology, physical geography, geomorphology, tourism and environmental protection. It is a rich resource for field trips and a comprehensive guide for travelers interested in the geomorphology of Georgia.
