

1. Record Nr.	UNINA9910574876003321
Autore	González García Wendy Priscilla
Titolo	Imaginario sociales : Cuatro aproximaciones desde las identidades y los espacios
Pubbl/distr/stampa	Colombia, : Universidad Santiago de Cali, 2020
Descrizione fisica	1 online resource (1-106 p.)
Soggetti	Social issues & processes
Lingua di pubblicazione	Spagnolo
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>El estudio de los imaginarios sociales ha tenido un crecimiento metodologias y disciplinas desde los que ha sido abordado son tan ricos y variados que abarcarlos en una sola publicacion resulta imposible. Existen, sin embargo, algunos trabajos que han buscado realizar un estado del arte sobre el tema, por lo que nos es posible dedicar unas palabras a ello. Aunque el tema ha sido abordado desde diferentes corrientes teoricas, quiza la que mas impacto ha tenido en la tradicion de habla hispano-portuguesa es la de la escuela francesa, y especialmente la obra de Cornelius Castoriadis. En su libro La institucion imaginaria de la sociedad, Castoriadis presenta de manera mas completa su concepto de imaginario social, dividiendo este en dos partes. La primera, proveniente de los articulos que habia publicado anteriormente en la revista Socialismo o Barbarie, representa una dura critica al marxismo y a lo que el llama la logica-ontologica heredada, mientras que la segunda es donde Castoriadis presenta de manera mas detallada su concepto de imaginario social utilizando elementos como lo historico-social, legein y teukhein y los magmas de significaciones (Castoriadis, 2013). Dichos conceptos aparecen de una u otra manera en la mayor parte de los estudios sobre imaginarios que se tienen en la region.</p>

Titolo	Urban Drought : Emerging Water Challenges in Asia // edited by Bhaswati Ray, Rajib Shaw
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2019
ISBN	981-10-8947-7
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (427 pages)
Collana	Disaster Risk Reduction, Methods, Approaches and Practices, , 2196-4114
Disciplina	333.910095
Soggetti	Natural disasters Water Hydrology Ecology Sustainability Human geography Natural Hazards Environmental Sciences Human Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	- Defining Urban Water Insecurity: Concepts and Relevance -- Water Insecurity in Asian Cities -- Climate Change: Implication on Urban Drought -- Developing Water Security Index for Urban Areas -- Water Energy Food Nexus: A Provision to Tackle Urban Drought -- Coping with Scarcity and Urban Water Governance: Case of Udon Thani's City Region -- Bridging the Distances between Far Water and Near Water: Case of Yanagawa City from Japan -- Resilience to Water Related Disaster: Risks, Vulnerabilities and Coping Strategies in Dhaka -- Resilience Perspective for Planning Urban Water Infrastructure: A Case of Nagpur City -- Urban Droughts in India: Case study of Delhi -- Future Urban Crisis in Mountain Regions: Example of Kathmandu Valley, Nepal -- Drought and Urbanization: The Case of the Philippines -- Coping with urban water insecurity in the colonial city of Kolkata and implications on Sustainable Development Goals -- Urban Drought

Management through Water Conservation: Issues, Challenges and Solutions -- Urban Water and Health Issues in Hong Kong -- Urban Water Issues in the Megacity of Tehran -- Soil Sealing and Depleting Groundwater in Rapidly Growing Peshawar City District, Pakistan -- Adaptive Policy Responses in Managing Urban Water Crisis in Sri Lanka -- Preparing for the Future: Challenges in Water Management in Colombo, Sri Lanka -- Water challenges in Ulaanbaatar, Mongolia -- Water Scarcity in Himalayan Hill Town: A Study of Darjeeling Municipality, India -- Urban Water Governance: Pricing of Water for the Slum Dwellers of Dhaka Metropolis -- Urban Water Management Issues and Challenges of Post The 2004 Indian Ocean Tsunami Recovery: Lessons Learned from Banda Aceh City, Indonesia -- Implications of Water Insecurity and Future Prospects in Asian Cities.

Sommario/riassunto

This book presents water insecurity issues in urban areas while developing a water security index and explores the innovative approaches to water development and management with examples from Asian cities. The urban water crisis is a global phenomenon, but it is more obvious in the megacities of the developing world. Urban drought, although not a familiar term, will pose a significant threat to humankind in the near future, especially in the context of increasing population in cities. Many cities are already unable to provide safe, clean water for their citizens. Some of the world's largest cities depend heavily on groundwater for their water supply. It is unlikely that dependence on aquifers, which take many years to recharge, will be sustainable. As urban populations grow, water use will need to shift from agriculture to municipal and industrial uses, making decisions about allocating between different sectors difficult. Inefficient water-use practices by households and industries, fragmented management of water between sectors and institutions, climate-induced water shortages, environmental degradation of water sources, and inadequate use of alternate sources are also issues of major concern. Despite recent advances in the literature, there exists a considerable gap in attempting an integrated water-resource management approach. Covering all aspects of urban drought and water insecurity, this book is a valuable resource for students, researchers, academics, policy makers, and development practitioners.
