Real-Time Data Analysis Using Smart Phone Mobile Application by Marakkalage Sumudu Hasala, Billy Pik Lik Lau, Sanjana Kadaba Viswanath, Yuen Chau, Belinda Yuen -- 12. Assessing Older Adults' Social Connectedness in Bukit Panjang Town by Anna Lane -- 13. Designing with Older Residents by Belinda Yuen and Cheong Sue Wei. .
Sommario/riassunto	This book contains a collection of studies that have been conducted

among older residents in Singapore. Different methods, from surveys to crowd sourcing, have been used to investigate the older adults' lived experiences and social participation in the residential environment. The findings reveal that older residents interact with the built environment in ways that reflect their changing capabilities and lifestyles. Since the built environment – where we live and go – can have an important impact on our daily lives, especially among older people, understanding these experiences and perceived needs is important to help older individuals age within their community.
