| Sommario/riassunto | This book contributes to an area of study that is of interest to linguists of all backgrounds. Typological in nature this volume presents data analysis from the major language families of Africa as well as Sino-Tibetan, Austronesian, Japanese, Indo-European, Siouan and Penutian. The 16 contributors to the volume share a commitment to examining the language phenomena pertaining to the volume's theme with a fresh eye. While most of the papers make reference to existing theoretical frameworks, each also makes a novel and sometimes surprising contribution to the body of knowledge and theory concer |

Nota di contenuto	Clustering, Classification, Modeling, and Forecasting -- Cognition Computation and Neural Networks -- Intelligent Control -- Signal, Image and Video Processing -- Bio-Signal and Medical Image Analysis. .
Sommario/riassunto	This book constitutes the refereed proceedings of the 14th International Symposium on Neural Networks, ISNN 2017, held in Sapporo, Hakodate, and Muroran, Hokkaido, Japan, in June 2017. The 135 revised full papers presented in this two-volume set were carefully reviewed and selected from 259 submissions. The papers cover topics like perception, emotion and development, action and motor control, attractor and associative memory, neurodynamics, complex systems, and chaos.

Nota di contenuto	Chapter 1. General data on carbon allotropes -- Chapter 2. Conventional carbon allotropes -- Chapter 3.Classic carbon nanostructures -- Chapter 4.Less-common carbon nanostructures -- Chapter 5. Other existing carbon forms -- Chapter 6. Predicted carbon forms -- Chapter 7.Coordination/organometallic compounds and composites of carbon allotropes -- Chapter 8. Solubilization and dispersion of carbon allotropes and their metal-complex composites -- Chapter 9.Carbon allotropes in the environment and their toxicity -- Chapter 10. Applications and cost-benefit data -- Chapter 11. Student zone: Overview, training, practices and exercises -- Chapter 12. Conclusions and further outlook.
Sommario/riassunto	This book provides a detailed description of metal-complex functionalized carbon allotrope forms, including classic (such as graphite), rare (such as M- or T-carbon), and nanoforms (such as carbon nanotubes, nanodiamonds, etc.). Filling a void in the nanotechnology literature, the book presents chapters generalizing the

synthesis, structure, properties, and applications of all known carbon allotropes. Metal-complex composites of carbons are described, along with several examples of their preparation and characterization, soluble metal-complex carbon composites, cost-benefit data, metal complexes as precursors of carbon allotropes, and applications. A lab manual on the synthesis and characterization of carbon allotropes and their metal-complex composites is included. Provides a complete description of all carbon allotropes, both classic and rare, as well as carbon nanostructures and their metal-complex composites; Contains a laboratory manual of experiments on the synthesis and characterization of metal-complex carbon composites; Discusses applications in diverse fields, such as catalysis on supporting materials, water treatment, sensors, drug delivery, and devices.
