

1. Record Nr.	UNINA9910337939903321
Autore	Kreissig Katharina
Titolo	Identify Common Tropical and Subtropical Ornamental Plants by Flower Colour : A Nature Guide for the Journey // by Katharina Kreissig
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer Spektrum, , 2019
ISBN	3-662-58817-X
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (111 pages)
Disciplina	635.9
Soggetti	Plants Life sciences Nature Ecology Plant Systematics/Taxonomy/Biogeography Popular Life Sciences Popular Science in Nature and Environment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Foreword -- Introduction -- Yellow flowers -- Orange flowers -- Red flowers -- Pink flowers -- Blue flowers -- White flowers -- Appendix.
Sommario/riassunto	This book is a practical, compact guide for the identification of common tropical and subtropical ornamental plants by flower colour. It is intended for anyone who is interested in plants and would like to get to know the attractive flowering plants of warm regions while travelling. Certainly everyone in a foreign country has at some point admired a particularly exotic flower and wished to know which plant it is. With appealing photos and comprehensible texts, this book provides the answer - quickly and easily. The author is an experienced tour guide and is regularly asked for eye-catching, ornamental plants on the way. She photographed the frequently requested plants and arranged them according to colour in this nature guide. This book is also suitable for beginners without previous botanical knowledge due to its illustrations and simple sorting. About the author Katharina Kreissig studied biology at the Christian-Albrechts-University Kiel. She works at Springer Nature

in the field of academic distance education and part-time studies. She also works as a lecturer, nature guide, and scientific tour guide for study trips focusing on biology, including expedition cruise trips.
