

1. Record Nr.	UNINA9910338002703321
Autore	Wiley Matt
Titolo	Advanced R statistical programming and data models : analysis, machine learning, and visualization // by Matt Wiley, Joshua F. Wiley
Pubbl/distr/stampa	Berkeley, CA : , : Apress : , : Imprint : Apress, , 2019
ISBN	9781484228722 1-5231-5031-9 1-4842-2872-3
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XX, 638 p. 207 illus., 127 illus. in color.)
Disciplina	005.13
Soggetti	R (Llenguatge de programació) Estadística matemàtica Programming languages (Electronic computers) Computer programming Mathematical statistics R (Computer program language) Programming Languages, Compilers, Interpreters Programming Techniques Probability and Statistics in Computer Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1 Univariate Data Visualization -- 2 Multivariate Data Visualization -- 3 Generalized Linear Models 1 -- 4 Generalized Linear Models 2 -- 5 Generalized Additive Models -- 6 Machine Learning: Introduction -- 7 Machine Learning: Unsupervised -- 8 Machine Learning: Supervised -- 9 Missing Data -- 10 Generalized Linear Mixed Models: Introduction -- 11 Generalized Linear Mixed Models: Linear -- 12 Generalized Linear Mixed Models: Advanced -- 13 Modeling IIV -- Bibliography.
Sommario/riassunto	Carry out a variety of advanced statistical analyses including generalized additive models, mixed effects models, multiple imputation, machine learning, and missing data techniques using R. Each chapter starts with conceptual background information about the techniques, includes multiple examples using R to achieve results, and

concludes with a case study. Written by Matt and Joshua F. Wiley, *Advanced R Statistical Programming and Data Models* shows you how to conduct data analysis using the popular R language. You'll delve into the preconditions or hypothesis for various statistical tests and techniques and work through concrete examples using R for a variety of these next-level analytics. This is a must-have guide and reference on using and programming with the R language. You will: Conduct advanced analyses in R including: generalized linear models, generalized additive models, mixed effects models, machine learning, and parallel processing Carry out regression modeling using R data visualization, linear and advanced regression, additive models, survival / time to event analysis Handle machine learning using R including parallel processing, dimension reduction, and feature selection and classification Address missing data using multiple imputation in R Work on factor analysis, generalized linear mixed models, and modeling intraindividual variability .
