Autore	Vesterli Sten
Titolo	Oracle Visual Builder Cloud Service Revealed : Rapid Application Development for Web and Mobile / / by Sten Vesterli
Pubbl/distr/stampa	Berkeley, CA : , : Apress : , : Imprint : Apress, , 2019
ISBN	9781484249291
	1484249291
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (304 pages)
Disciplina	610.285
Soggetti	Database management
	Computer programming
	Mobile computing
	Database Management
	Web Development
	Mobile Computing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Building Your First Web Application -- 2. Building Business Objects -- 3. Working with Service Connections -- 4. Building Web Applications -- 5. Working with Data -- 6. Logic in the Business Layer -- 7. Logic in the User Interface -- 8. Using the Visual Builder Add-in for Excel -- 9. Building Mobile Applications -- 10. VBCS Security -- 11. Managing Applications -- 12. Enterprise Development with VBCS -- 13. Integrating with Process Cloud Service.
Sommario/riassunto	Build and deploy an attractive, user-friendly web or mobile application in one day or less using Oracle's new, low-code development tool: Visual Builder Cloud Service. Today's IT world is fast-paced, and the ability to rapidly deliver running code is the most crucial and sought-after skill a developer can have. Oracle has brought together their enterprise experience, advanced usability knowledge, and their best cloud engineering to produce an innovative platform giving developers unprecedented productivity. You will learn how to use all aspects of Oracle Visual Builder Cloud Service to build web or mobile applications. Using the fully browser-based development environment, you'll gain

experience with all the modern user-interface components that the tool offers for a visual, user-interface-driven, development approach. You'll also see how to use the integrated data management capabilities and existing REST data services to store your data, and learn how to easily transfer applications to a test/staging environment and later to production, while continuing to develop the next version in the development environment. What You'll Learn: Build great-looking web and mobile applications in a browser-based, visual design environment Define custom business logic in the visual logic editor or with JavaScript Manage multiple concurrent application versions from development through staging and production Define business objects with validation logic for application-specific data Communicate with, and draw data from, existing REST web services Use Visual Builder Cloud Service to expand Oracle SaaS solutions.
