Titolo	Governance Models for Creating Public Value in Open Data Initiatives / / edited by Manuel Pedro Rodríguez Bolívar, Kelvin Joseph Bwalya, Christopher G. Reddick
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-14446-1
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (187 pages)
Collana	Public Administration and Information Technology, , 2512-1812 ; ; 31
Disciplina	658.046 006.33
Soggetti	Public policy Political science International organization Public administration Public Policy Governance and Government International Organization Public Administration
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part I: Open Government Data Theory and Practice -- Chapter 1: Turning Open Government Data into Public Value: Testing the COPS Framework for the Co-Creation of OGD-Driven Public Services -- Chapter 2: Governing Open Spatial Data Infrastructures: The case of the United Kingdom -- Chapter 3: Online Fiscal Transparency of U.S. State Governments: An Analysis Using Public Value Framework -- Chapter 4: Towards the open government eco-system: connecting e-participation models and open government to analyze public policies -- Part II: Open Government Data and Smart Cities and Government -- Chapter 5: The Role of Open Data in Smart Cities: Exploring status in resource- constrained countries -- Chapter 6: Open Government Initiatives in Spanish Local Governments. An Examination of the State of the art -- Chapter 7: Empowering communities and improving public services

through open data: South African Local Government Perspective --
Chapter 8: Blockchain for Open Data – Exploring Conceptual
Underpinnings and Practice -- Index.

Sommario/riassunto

This book relies on the conceptual model of Open Government (OG), focusing on transparency and, concretely, in open data initiatives at the local government context with the aim of improving participation and collaboration. Most Open Government models are centered on three pillars: transparency, participation and collaboration. Transparency is a crucial ingredient of OG and, applied to data openness means to ensure that the data are well known, comprehensible, easily accessible and open to all. new governance models based on different open data models have not been proposed up to now. The chapter authors seek to contribute recent research to the discussion on governance models of open data initiatives to support Open Governments with the aim of creating public value. It includes both theoretical and empirical studies on governments models in open data initiatives. .
