Sommario/riassunto	This book sheds light on one of the most under-studied but powerful navies in the world. Using a multifaceted approach, it examines how the Republic of Korea Navy (ROKN) has sought to transform itself from a coastal naval force focused solely on deterring North Korea to a navy capable of operating in the blue waters of East Asia and beyond. The project argues that peninsular and regional security dynamics, technological developments, the US-South Korea alliance and internal politics combine to inform and shape ROKN modernisation. Ian Bowers is Associate Professor at the Norwegian Institute for Defence Studies,

Oslo, Norway.
