Sommario/riassunto	This book draws lessons and conclusions, based on the methodology

outlined in the author's previous book, *Water as a Catalyst for Peace* (Routledge, 2013), and further charts the course to a more practical framework for achieving regional stability and justice. Past agreements are examined and analysed, outlining the change along the way that occurred to the land and people of Palestine. The book is written with the intention of exposing past events that led to the current situation, evaluating the current state of the conflict in light of new circumstances and the reality on the ground. Viable options are explored to seek a practical and satisfactory negotiated settlement that ensures justice and viability. In conclusion, a roadmap for future direction is proposed to achieve equitable water allocation through proper negotiation between Israel and Palestine and to ultimately settle the conflict. Water resources allocation is at the heart of this pragmatic framework and roadmap.
