Soggetti	Classicism - France - History - 20th century French literature - Classical influences Civilization, Ancient, in literature Greece In literature Rome In literature
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	L'influence exercée par l'antiquité classique sur la personnalité et l'œuvre de Henry de Montherlant est clairement révélée par l'analyse de sa biographie, et surtout par l'étude des thèmes principaux de l'œuvre ainsi que des écrits consacrés par l'auteur à l'antiquité, si on les confronte à leurs sources antiques. Henry de Montherlant apparait alors comme l'un des écrivains contemporains qui auront le plus manifestement prouvé la permanence dans les lettres françaises de la civilisation gréco-romaine. The influence exerted on Montherlant's personality and works by antiquity is clearly revealed by the perusal of his biography and above all of the main themes as well as the pieces of writing dealing with antiquity, should they be confronted with their antique sources. Henry de Montherlant is thus emerging as one of the contemporary writers that would have demonstrated in the most obvious way the permanence of greco-latin civilization in French literature.
