Sommario/riassunto

Ruth Bloch's stellar essays on the origins of Anglo-American conceptions of gender and morality are brought together in this valuable book, which collects six of her most influential pieces in one place for the first time and includes two new essays. The volume illuminates the overarching theme of her work by addressing a basic historical question: Why did the attitudes toward gender and family relations that we now consider traditional values emerge when they did? Bloch looks deeply into eighteenth-century culture to answer this question, highlighting long-term developments in religion, intellectual history, law, and literature, showing that the eighteenth century was a time of profound transformation for women's roles as wives and mothers, for ideas about sexuality, and for notions of female moral authority. She engages topics from British moral philosophy to colonial laws regarding courtship, and from the popularity of the sentimental novel to the psychology of religious revivalism. Lucid, provocative, and wide-ranging, these eight essays bring a revisionist challenge to both women's studies and cultural studies as they ask us to reconsider the origins of the system of gender relations that has dominated American culture for two hundred years.

2. Record Nr.	UNINA9910484882203321
Titolo	International Conference on Innovative Computing and Communications : Proceedings of ICICC 2020, Volume 1 / / edited by Deepak Gupta, Ashish Khanna, Siddhartha Bhattacharyya, Aboul Ella Hassanien, Sameer Anand, Ajay Jaiswal

Sommario/riassunto	This book includes high-quality research papers presented at the Third International Conference on Innovative Computing and Communication (ICICC 2020), which is held at the Shaheed Sukhdev College of Business

Studies, University of Delhi, Delhi, India, on 21–23 February, 2020. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications. .

3. Record Nr.	UNINA9910338259403321
Titolo	The Abel Prize 2013-2017 // edited by Helge Holden, Ragni Piene
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer , , 2019
ISBN	3-319-99028-4
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (xi, 774 pages) : illustrations

Sommario/riassunto

The book presents the winners of the Abel Prize in mathematics for the period 2013–17: Pierre Deligne (2013); Yakov G. Sinai (2014); John Nash Jr. and Louis Nirenberg (2015); Sir Andrew Wiles (2016); and Yves Meyer (2017). The profiles feature autobiographical information as well as a scholarly description of each mathematician's work. In addition, each profile contains a Curriculum Vitae, a complete bibliography, and the full citation from the prize committee. The book also includes photos for the period 2003–2017 showing many of the additional activities connected with the Abel Prize. As an added feature, video interviews with the Laureates as well as videos from the prize ceremony are provided at an accompanying website (<http://extras.springer.com/>). This book follows on *The Abel Prize: 2003-2007. The First Five Years* (Springer, 2010) and *The Abel Prize 2008-2012* (Springer 2014), which profile the work of the previous Abel Prize winners.
