

1. Record Nr.	UNINA9910340846603321
Autore	Poutouli Wiyao
Titolo	Heteropteres phytophages et predateurs d'Afrique de l'Ouest [[electronic resource] =] : Phytophagous and predatory Heteroptera in West Africa // Wiyao Poutouli, Pierre Silvie, Henri-Pierre Aberlenc ; [translation into English, A. Lewer]
Pubbl/distr/stampa	Versailles Cedex, France, : Editions Quæ Wageningen, Netherlands, : CTA, 2011
ISBN	2-7592-0952-0
Descrizione fisica	1 online resource (83 p.)
Collana	Maladies et Ravageurs Series
Altri autori (Persone)	SilviePierre AberlencHenri-Pierre LewerA
Soggetti	Agricultural pests - Africa, West Hemiptera - Africa, West
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"Specific studies on the biodiversity or the implementation of the concept of integrated farming imply the need to know how to identify the insect pests or natural enemies. In some countries, growing transgenic, caterpillar-resistant plants, like cotton or corn, has reduced the use of insecticide treatments to control these pests. Some families of bugs like the Pentatomidae and the Miridae have thus become major pests. It is therefore important to improve our understanding of these pests sometimes considered as secondary. People working in the field will find in this book a brief description of the main species of phytophage and predatory bugs found in West Africa, principally in cotton, corn, cowpea (<i>Vigna unguiculata</i>), soy bean and sorghum."
