	Pubbl/distr/stampa	Cambridge, Massachusetts : , : The MIT Press, , [2019] ©2019
	ISBN	0-262-35471-3 0-262-35472-1
	Descrizione fisica	1 online resource (xii, 323 pages) : illustrations (chiefly color)
	Disciplina	025.0425
	Soggetti	Internet searching Internet research Web search engines
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	17 The Mystery of the Parrotfish, or Where Does That White Sand Really Come From? How to Triangulate Multiple Sources to Find a Definitive Answer
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Intro; Contents; Acknowledgments; 1 Introduction: How You Can Harness the Power of Online Research-Why You Should Improve Your Online Researching Skills; How to Read This Book; How to Do It; 2 Finding a Mysterious Location Somewhere in the World: How to Use Multiple Information Sources to Zero In on a Resource; Research Lessons; How to Do It; Try This Yourself; 3 Do Lakes in Africa Sometimes Explode? How to Focus Your Search with "site:" and Using Specialized Terms; Research Lessons; How to Do It; Try This Yourself 4 Things You Notice While Traveling: How and When to Switch Search Modes to Find InformationResearch Lessons; How to Do It; Try This Yourself; 5 Is That Plant Poisonous or Not? How to Find Highly Localized and Domain-Specific Information; Research Lessons; Try This Yourself; 6 What's the Most Likely Way You'll Die? How to Be Explicit about What You're Searching to Find (and Why That Matters); Research Lessons; How to Do It; Try This Yourself; 7 When Would You Want to Read the Italian Wikipedia? How to Look for Information from Other Languages in Wikipedia and Other Sources

Sommario/riassunto	"How to be a great online searcher, demonstrated with step-by-step searches for answers to a series of intriguing questions (for example, "Is that plant poisonous?"). We all know how to look up something online by typing words into a search engine. We do this so often that we have made the most famous search engine a verb: we Google it-- "Japan population" or "Nobel Peace Prize" or "poison ivy" or whatever we want to know. But knowing how to Google something doesn't make us search experts; there's much more we can do to access the massive collective knowledge available online. In The Joy of Search, Daniel Russell shows us how to be great online researchers. We don't have to be computer geeks or a scholar searching out obscure facts; we just need to know some basic methods. Russell demonstrates these methods with step-by-step searches for answers to a series of intriguing questions--from "what is the wrong side of a towel?" to "what is the most likely way you will die?" Along the way, readers will discover essential tools for effective online searches--and learn some fascinating facts and interesting stories. Russell explains how to frame search queries so they will yield information and describes the best ways to use such resources as Google Earth, Google Scholar, Wikipedia, and Wikimedia. He shows when to put search terms in double quotes, how to use the operator (*), why metadata is important, and how to triangulate information from multiple sources. By the end of this engaging journey of discovering, readers will have the definitive answer to why the best online searches involve more than typing a few words into Google"--Publisher's description.
