1. Record Nr. UNINA9910456220503321

Autore	Bubnova Nina <1974->
Titolo	Governance impact on private investment [[electronic resource]] : evidence from the international patterns of infrastructure bond risk pricing / / Nina B. Bubnova
Pubbl/distr/stampa	Washington, DC, : World Bank, 2000
ISBN	1-280-08707-2 9786610087075 0-585-41508-0
Descrizione fisica	1 online resource (93 p.)
Collana	World Bank technical paper ; ; no. 488
Disciplina	332.67/253
Soggetti	Infrastructure (Economics) - Finance Corporate governance Investments Country risk Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.

2. Record Nr. UNINA9910346691403321

Autore	Blaabjerg Frede
Titolo	Applications of Power Electronics: Volume 1 / Frede Blaabjerg, Pooya Davari, Tomislav Dragicevic
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019 Basel, Switzerland : , : MDPI, , 2019
ISBN	9783038979753 3038979759
Descrizione fisica	1 electronic resource (476 p.)
Soggetti	History of engineering and technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Power electronics technology is still an emerging technology, and it has found its way into many applications, from renewable energy generation (i.e., wind power and solar power) to electrical vehicles (EVs), biomedical devices, and small appliances, such as laptop chargers. In the near future, electrical energy will be provided and handled by power electronics and consumed through power electronics; this not only will intensify the role of power electronics technology in power conversion processes, but also implies that power systems are undergoing a paradigm shift, from centralized distribution to distributed generation. Today, more than 1000 GW of renewable energy generation sources (photovoltaic (PV) and wind) have been installed, all of which are handled by power electronics technology. The main aim of this book is to highlight and address recent breakthroughs in the range of emerging applications in power electronics and in harmonic and electromagnetic interference (EMI) issues at device and system levels as discussed in robust and reliable power electronics technologies, including fault prognosis and diagnosis technique stability of grid-connected converters and smart control of power electronics in devices, microgrids, and at system levels.
