

1. Record Nr.	UNINA9910346698603321
Autore	Degen Wendelin L. F
Titolo	Kurven – Verstehen – Entwerfen – Berechnen – Darstellen
Pubbl/distr/stampa	KIT Scientific Publishing, 2018
ISBN	1000069243
Descrizione fisica	1 electronic resource (vii, 152 p. p.)
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The book is intended for a wide range of readers and contains an introduction to various practically relevant aspects of curves with many illustrations: It offers a treatment of the differential geometric basics, of Bézier and B-spline representations, of rational and algebraic curves, and introduces the reader to some special curves, which are important for applications or historical reasons. Proofs requiring more in-depth mathematical knowledge are dispensed with.
