

1. Record Nr.	UNINA9910346700303321
Autore	Choudhury Abhik Narayan
Titolo	Quantitative phase-field model for phase transformations in multi-component alloys
Pubbl/distr/stampa	KIT Scientific Publishing, 2013
ISBN	1000034598
Descrizione fisica	1 electronic resource (263 p. p.)
Collana	Schriftenreihe des Instituts für Angewandte Materialien, Karlsruher Institut für Technologie
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Phase-field modeling has spread to a variety of applications involving phase transformations. While the method has wide applicability, derivation of quantitative predictions requires deeper understanding of the coupling between the system and model parameters. The book highlights a novel phase-field model based on a grand-potential formalism allowing for an elegant and efficient solution to problems in phase transformations.
