

1. Record Nr.	UNINA9910346707303321
Autore	Bonenberger Theresa
Titolo	LED Farbmischung mit chaotischen Lichtleitern
Pubbl/distr/stampa	KIT Scientific Publishing, 2016
ISBN	1000051748
Descrizione fisica	1 electronic resource (III, 216 p. p.)
Collana	Spektrum der Lichttechnik / Karlsruher Institut für Technologie (KIT), Lichttechnisches Institut
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book describes a systematical method to efficiently and homogeneously mix rays of different coloured Light Emitting Diodes (LEDs) in both the angular and spatial domain. The focus of this work is the application of chaotic billiard geometries on the cross section of a light guide. Such a chaotic light guide offers the possibility to achieve complete colour mixing according to deterministic chaos theory.
