

1. Record Nr.	UNINA9910346720403321
Autore	Babrowski Sonja
Titolo	Bedarf und Verteilung elektrischer Tagesspeicher im zukunfftigen deutschen Energiesystem
Pubbl/distr/stampa	KIT Scientific Publishing, 2015
ISBN	1000044722
Descrizione fisica	1 online resource (XVI, 239 p. p.)
Collana	Produktion und Energie / Karlsruher Institut für Technologie, Institut für Industriebetriebslehre und industrielle Produktion u. Deutsch-Französisches Institut für Umweltforschung
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The power system model PERSEUS-NET-ESS is used to assess the need for daily electricity storage systems in Germany until 2040 under consideration of alternative technologies such as gas turbines or load shift potentials. This investment and dispatch model includes a DC approach of the German transmission grid and, thus, calculates not only the installed storage capacities, but also their optimal allocation.
