   Livello bibliografico   Monografia

   Sommario/riassunto   The Research Topic aims to highlight research on the processing of
                        words, sentences and discourses across languages. Articles
                        representing processing in a wide variety of human languages will be
                        featured. Efforts will be made to have articles, representing as many
                        language families as possible. The methodology used to investigate
                        language processing is open. Manuscripts may report studies involving
                        monolinguals or individuals knowing more than one language.
                        Research addressing the extent to which all human languages are
                        processed similarly are welcomed as are studies investigating the
                        extent to which the different types of linguistic knowledge are stored
                        differently in memory.
