

1. Record Nr.	UNINA9910484747603321
Autore	Delatolla Andrew
Titolo	Civilization and the Making of the State in Lebanon and Syria / / by Andrew Delatolla
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2021
ISBN	9783030576905 3030576906
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (ix, 285 pages)
Collana	Middle East Today, , 2945-7025
Disciplina	939.43 320.95691
Soggetti	Middle East - Politics and government World politics Africa - Politics and government Middle Eastern Politics Political History African Politics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1: Introduction -- Chapter 2: The Standards of Civilization and the Production of Statehood -- Chapter 3: Equality as a Standard of Civilization: The Opposition Towards Ottoman Tolerance -- Chapter 4: Race, Religion, and Civilization in Programs of Governance and Modernization -- Chapter 5: Territory, Identity, and Governance: Creating Order from Disorder -- Chapter 6: Violent Resistance: Interactions with Modernity and European Interference -- Chapter 7: Nationalism as Resistance: Acquiescing to European Identifiers. - Chapter 8: Preventing Autonomy: European Interests and the Application of a Standard of Civilization -- Chapter 9: Conclusion: Taking Histories of Post-Colonial Statehood Seriously.
Sommario/riassunto	'Given the over-generalization and abstraction in the analysis of the state, Delatolla's archival analysis of Lebanon and Syria is needed and welcome. He also guides us through the widespread phenomenon of state failure when many Global South countries mimic the made-in-

Europe "standard of civilization" template.' --Bahgat Korany, Professor, Department of Political Science, The American University in Cairo, Egypt 'This highly original study is part of a wave of scholarship in the fields of Middle East studies, political science and international relations, that pushes these disciplines beyond their intellectually rigid and outdated boundaries. Standing on the shoulders of post-colonial and post-structuralist thinkers, Delatolla has brought together academic, extensive archival and governmental records to extract the colonial and imperial legacies embedded in state-based frameworks for organizing human societies. While a study of the intellectual coloniality reproduced in Lebanon and Syria, Delatolla's strong analysis of power and critical framework is key to examining similar Eurocentric and state-centric models of governance in other Middle Eastern contexts.' --Shourideh C. Molavi, Senior Lecturer, Department of Urban Studies, University of Basel, Switzerland, and Lead Israel-Palestine Researcher, Forensic Architecture This book argues that the modern state, from the nineteenth century to the contemporary period, has consistently been used as a means to measure civilizational engagement and attainment. This volume historicizes this dynamic, examining how it impacted state-making in Lebanon and Syria. By putting social, political, and economic pressure on the Ottoman Empire to replicate the modern state in Europe, the book examines processes of racialization, nationalist development, continued imperial expansion, and resistance that became embedded in the state as it was assembled. By historicizing post-imperial and post-colonial state formation in Lebanon and Syria, it is possible to engage in a conceptual separation from the modern state, abandoning the ongoing reproduction of the state as a standard, or benchmark, of civilization and progress. Andrew Delatolla is Lecturer in Middle Eastern Studies in the School of Languages, Cultures and Societies at the University of Leeds, UK.

Titolo	The Least Cost Path From Landscape Genetics to Landscape Genomics
Pubbl/distr/stampa	Frontiers Media SA, 2018
Descrizione fisica	1 online resource (116 p.)
Collana	Frontiers Research Topics
Soggetti	Genetics (non-medical)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Ecosystems are the stage on which the play of evolution is acted, and ecosystems are complex, spatially structured and temporally varying. The purpose of this Research Topic is to explore critical challenges and opportunities for the transition from landscape genetics to landscape genomics. Landscape genetics has focused on the spatial analysis of small genetic datasets, typically comprised of less than 20 microsatellite markers, taken from clusters of individuals in putative populations or distributed individuals across landscapes. The recent emergence of large scale genomic datasets produced by next generation sequencing methods poses tremendous challenge and opportunity to the field. Perhaps the greatest is to produce, process, curate, archive and analyze spatially referenced genomic datasets in a way such that research is led by <i>a priori</i> hypotheses regarding how environmental heterogeneity and temporal dynamics interact to affect gene flow and selection. The papers in the Research Topic cover a broad range of topics under this area of focus, from reviews of the emergence of landscape genetics, to best practices in spatial analysis of genetic data. The compilation, like the emerging field itself, is eclectic and illustrates the scope of both the challenges and opportunities of this emerging field.</p>
