

1. Record Nr.	UNINA9910346757803321
Autore	Peter J. Mumby
Titolo	The Future of Coral Reefs Subject to Rapid Climate Change: Lessons from Natural Extreme Environments
Pubbl/distr/stampa	Frontiers Media SA, 2019
Descrizione fisica	1 electronic resource (198 p.)
Collana	Frontiers Research Topics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Examination of corals and reef-associated organisms which endure in extreme coral reef environments is challenging our understanding of the conditions that organisms can survive under. By studying individuals naturally adapted to unfavorable conditions, we begin to better understand the important traits required to survive rapid environmental and climate change. This Research Topic, comprising reviews, and original research articles, demonstrates the current state of knowledge regarding the diversity of extreme coral habitats, the species that have been studied, and the knowledge to-date on the mechanisms, traits and trade-offs that have facilitated survival.
