

1. Record Nr.	UNINA9910346766603321
Autore	Walla Waldemar
Titolo	Standard- und Modulbasierte digitale Rohbauprozesskette : Frühzeitige Produktbeeinflussung bezüglich Produktionsanforderungen im Karosserierohbau der Automobilindustrie
Pubbl/distr/stampa	KIT Scientific Publishing, 2017
ISBN	1000061838
Descrizione fisica	1 electronic resource (XII, 205 p. p.)
Collana	Reihe Informationsmanagement im Engineering Karlsruhe / Hrsg.: Karlsruher Institut für Technologie, Institut für Informationsmanagement im Ingenieurwesen (IMI)
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Standardization and modularization offers big advantages not only for the product development but also for production and planning departments. But industry often doesn't utilize these advantages. This contribution introduces a new method which supports the developer to design a new product in order to fit to the standardized and modularized production.
