

1. Record Nr.	UNINA9910346767003321
Autore	Herter Johannes
Titolo	Eine Methode zur Unterstützung der disziplinübergreifenden Zusammenarbeit in der Produktentwicklung auf Grundlage einer integrierten Visualisierung konzeptioneller Modelle
Pubbl/distr/stampa	KIT Scientific Publishing, 2017
ISBN	1000060573
Descrizione fisica	1 electronic resource (XV, 204 p. p.)
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Industrial product development requires close collaboration between experts of several disciplines. Misunderstandings and discussions are inevitable. An integrated visualization of discipline specific conceptual models can foster agreement between experts. This work introduces a three dimensional visualization for integrated conceptual models. Models are arranged in a common 3-D information space. Dependencies are visible and provide a means for interdisciplinary problem solving.</p>
