

1. Record Nr.	UNINA9910346769303321
Autore	Järvinen Emma
Titolo	Investigations of Angular Light Scattering by Complex Atmospheric Particles
Pubbl/distr/stampa	KIT Scientific Publishing, 2016
ISBN	1000056601
Descrizione fisica	1 electronic resource (XVI, 230 p. p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book experimentally investigates the angular light scattering properties of three atmospherically relevant particles: ice crystals, dust particles and secondary organic aerosol particles. Key optical quantities under examination are the near-backscattering depolarisation properties and the angular light scattering function. The main question is how these parameters are related to the particle microphysical properties, such as particle size and complexity.
