

1. Record Nr.	UNINA9910346769803321
Autore	Manka Daniel
Titolo	Elektrochemisch-optische Impedanzspektroskopie
Pubbl/distr/stampa	KIT Scientific Publishing, 2016
ISBN	1000056617
Descrizione fisica	1 electronic resource (V, 200 p. p.)
Collana	Schriften des Instituts für Angewandte Materialien - Werkstoffe der Elektrotechnik, Karlsruher Institut für Technologie / Institut für Angewandte Materialien - Werkstoffe der Elektrotechnik
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book introduces a new method to develop electrode models. The method is based on electrical impedance measurements combined with dynamic reflection and transmission measurements from the electrode surface. The implementation of an electrochemical-optical model allows advanced model validation. The method is applied exemplary to a graphite anode and a redox-polymer electrode, which is leading to highly detailed electrode models.
