

1. Record Nr.	UNINA9910346771303321
Autore	Stammel Johannes Josef
Titolo	Architekturbasierte Bewertung und Planung von Änderungsanfragen
Pubbl/distr/stampa	KIT Scientific Publishing, 2017
ISBN	1000054452
Descrizione fisica	1 online resource (XIX, 318 p. p.)
Collana	The Karlsruhe Series on Software Design and Quality / Ed. by Prof. Dr. Ralf Reussner
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Software Architecture covers the technical organization of a software system and principles which determine design and evolution of the system. The research issue of this work results from software evolution, when the software needs to be modified. The contribution of this book is a method for change request analysis based on software architecture models. The method supports derivation of tasks covering several work areas and life cycle phases.
