

1. Record Nr.	UNINA9910346773303321
Autore	El-Haji Mohanad
Titolo	Ontologie-basierte Definition von Anforderungen an Validierungswerkzeuge in der Fahrzeugtechnik
Pubbl/distr/stampa	KIT Scientific Publishing, 2016
ISBN	1000052725
Descrizione fisica	1 electronic resource (XIV, 241 p. p.)
Collana	Karlsruher Schriftenreihe Fahrzeugsystemtechnik / Institut für Fahrzeugsystemtechnik
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Validation and verification are central activities of product engineering. The aim of these activities is to predict and evaluate the future system behaviour of the product in development. This is achieved by conducting tests and interpreting the generated measurement data. This work introduces an ontology-based method for increasing the efficiency and effectively of innovative automotive development projects, especially in cases where an organisational knowledge base does not exist yet.
