

1. Record Nr.	UNINA9910346774703321
Autore	Peters Katharina
Titolo	Flussigprozessierung von Multischicht-OLEDs aus kleinen Molekulan
Pubbl/distr/stampa	KIT Scientific Publishing, 2016
ISBN	1000051513
Descrizione fisica	1 online resource (XV, 237 p. p.)
Soggetti	Biotechnology
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Organic light-emitting diodes consist of several layers of organic molecules just a few nanometers thick. In future, it may become possible to change the manufacturing process from vacuum deposition to a cost-effective liquid processing. This theoretical and practical investigation focuses on the underlying processes, in particular coating and drying, as well as the factors influencing the separation of individual layers in multilayer systems consisting of small molecules.
