

1. Record Nr.	UNINA9910346774903321
Autore	Müller Sabrina Alexandra
Titolo	Untersuchungen zur Herstellung geträgerter mono- und bimetallischer Nanopartikel mithilfe von überkritischem CO ₂
Pubbl/distr/stampa	KIT Scientific Publishing, 2016
ISBN	1000051502
Descrizione fisica	1 electronic resource (X, 201 p. p.)
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Mono- and bimetallic nanoparticles were deposited onto different powdered supports by Supercritical Fluid Reactive Deposition (SFRD). Carbon dioxide was used as supercritical solvent and hydrogen as reduction agent. In order to optimize the production process unknown factors influencing the particle and product properties were extensively studied.
