

1. Record Nr.	UNINA9910346777503321
Autore	Kühn Michael
Titolo	Zweikomponentige Methoden im Rahmen der zeitabhängigen Dichtefunktionaltheorie - Theorie, Implementierung und Anwendung
Pubbl/distr/stampa	KIT Scientific Publishing, 2015
ISBN	1000048734
Descrizione fisica	1 online resource (215 p. p.)
Soggetti	Chemistry
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book reports on the derivation, implementation and application of two-component methods in the framework of time-dependent density functional theory. These methods allow the calculation of electronic transitions as well as the calculation of the correlation contribution to the electronic ground-state energy (RPA) and to the orbital energies (GW) including spin-orbit coupling. The focus of the applications is put on organic light-emitting diodes and clusters of heavy metals.
