1. Record Nr. UNINA9910346778603321

Autore	Peter Moritz
Titolo	Towards magnetic resonance in scanning tunneling microscopy using heterodyne detection
Pubbl/distr/stampa	KIT Scientific Publishing, 2015
ISBN	1000048009
Descrizione fisica	1 online resource (151 p. p.)
Collana	Experimental Condensed Matter Physics / Karlsruher Institut für Technologie, Physikalisches Institut
Soggetti	Physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The present work introduces a new concept for magnetic resonance measurements in the GHz regime inside a scanning tunneling microscope. It is based on heterodyne detection in a spin-polarized tunneling barrier. The experimental requirements, including a new method to suppress transmission effects, are explained. Measurements on three model systems which were studied to validate the new technique are presented and compared to simulations.
