

1. Record Nr.	UNINA9910346783203321
Autore	Reinhardt Marc
Titolo	Linear Estimation in Interconnected Sensor Systems with Information Constraints
Pubbl/distr/stampa	KIT Scientific Publishing, 2015
ISBN	1000045577
Descrizione fisica	1 electronic resource (XVII, 227 p. p.)
Collana	Karlsruhe Series on Intelligent Sensor-Actuator-Systems / Karlsruher Institut für Technologie, Intelligent Sensor-Actuator-Systems Laboratory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>A ubiquitous challenge in many technical applications is to estimate an unknown state by means of data that stems from several, often heterogeneous sensor sources. In this book, information is interpreted stochastically, and techniques for the distributed processing of data are derived that minimize the error of estimates about the unknown state. Methods for the reconstruction of dependencies are proposed and novel approaches for the distributed processing of noisy data are developed.</p>
