Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Two contributions here are seeking access to the continuation of a temporarily buried Petersburg tradition in a European space on the example of the German-speaking poet Henry von Heiseler. That "his" Puškin is to be understood in this frame of interpretation as a cultural symbol with identity-forming and dialogical potential and not just as a "translat" reflects the positions of the said translator.
