

1. Record Nr.	UNINA9910346861003321
Autore	Li Zhen
Titolo	Fortgeschrittene Methoden zur Beschreibung der Wirbelschicht-Sprühgranulation
Pubbl/distr/stampa	KIT Scientific Publishing, 2013
ISBN	1000036117
Descrizione fisica	1 electronic resource (VIII, 216 p. p.)
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A multiscale simulation model is developed by combining the CFD Simulation and the population balance equations to describe a transient process of fluidized bed spray granulation. In this model, the CFD simulation generates the particle growth and nucleation rates in consideration of fluid dynamics, drying and multiple interactions, such as drops deposition, dust integration and nucleation between different particles (drops, dust and granules).
