

1. Record Nr.	UNINA9910346861603321
Autore	Kern Matthias
Titolo	Modellierung kinetisch kontrollierter, turbulenter Flammen für Magerbrennkonzepete
Pubbl/distr/stampa	KIT Scientific Publishing, 2013
ISBN	1000035938
Descrizione fisica	1 online resource (297 p. p.)
Soggetti	Biotechnology
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The design of technical combustion systems demands efficient as well as precise models correctly predicting the interaction of turbulence and combustion. Main focus of this work is to develop and evaluate turbulent combustion models applicable for the simulation of modern lean combustion concepts using gaseous or liquid fuels. Within this work these models are both validated on model flames and applied to technical systems.
