1.
Record Nr.	UNINA9910346861803321
Autore	Gorges Nicolas
Titolo	Haptische Objekterkennung mit einer humanoiden Roboterhand
Pubbl/distr/stampa	KIT Scientific Publishing, 2012
ISBN	1000035928
Descrizione fisica	1 electronic resource (VII, 241 p. p.)
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The focus of this work is on the analysis of haptic sensor data acquired by a humanoid robot for shape-based object classification. The central theme is the examination of different approaches for the fusion of haptic sensor data in order to distinguish objects roughly with a few or in detail with several samples. A part of the presented system is an attention space with provide a strategy for an active object classification.
