

1. Record Nr.	UNINA9910346897403321
Autore	Krogmann Klaus
Titolo	Reconstruction of Software Component Architectures and Behaviour Models using Static and Dynamic Analysis
Pubbl/distr/stampa	KIT Scientific Publishing, 2012
ISBN	1000025617
Descrizione fisica	1 online resource (XVII, 371 p. p.)
Collana	The Karlsruhe Series on Software Design and Quality / Ed. by Prof. Dr. Ralf Reussner
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Model-based performance prediction systematically deals with the evaluation of software performance to avoid for example bottlenecks, estimate execution environment sizing, or identify scalability limitations for new usage scenarios. Such performance predictions require up-to-date software performance models. This book describes a new integrated reverse engineering approach for the reconstruction of parameterised software performance models (software component architecture and behaviour).
