

1. Record Nr.	UNINA9910346900003321
Autore	Wissert Matthias Dominik
Titolo	Optical antennas : linear and nonlinear excitation and emission
Pubbl/distr/stampa	KIT Scientific Publishing, 2011
ISBN	1000024929
Descrizione fisica	1 electronic resource (IX, 186 p. p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The linear and nonlinear resonance behaviour of optical antennas (metallic nanostructures showing resonance behaviour at optical frequencies) made of gold and aluminum using electron-beam lithography is investigated. Specifically, it is of interest how the emission behaviour is changed by the coupling of two antenna arms via a small gap. Experimental techniques applied include dark-field spectroscopy and two-photon luminescence.
