

1. Record Nr.	UNINA9910346928303321
Autore	Rings Jörg
Titolo	Monitoring the water content evolution of dikes
Pubbl/distr/stampa	KIT Scientific Publishing, 2009
ISBN	1000009929
Descrizione fisica	1 electronic resource (147 p. p.)
Collana	Wissenschaftliche Berichte des Instituts für Meteorologie und Klimaforschung der Universität Karlsruhe (TH)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The water content evolution of model dikes is monitored with geophysical methods. Water content changes are successfully quantified using electrical resistivity tomography. Numerical simulation of water flow in a dike model is used to estimate the variability of water content. Modeling of synthetic data sets is used to evaluate the quality of resistivity quantification using ERT. An ensemble approach is proposed to improve the interpretation of ERT inversions.
