Sommario/riassunto

The book presents a wide range of research at the intersection of linguistics and literary studies. Its first part focuses on cultural linguistics and cognitive linguistics, in particular metaphor research. In the second part of the book a set of issues related to cultures and narratives are presented. These include timely discussions on various aspects of discourse ranging from online and media discourse to literary analyses and issues related to AI.

Sommario/riassunto	Die Bioseparation ist mitunter der kostenintensivste Teil der Bioproduktion. Daher sind Technologien nötig, die das Downstream processing vereinfachen. Die Magnetseparation und die Elektrofiltration sind Methoden, die durch externe Felder einen Trennschritt verbessern und somit die Raum-Zeit-Ausbeute des Verfahrensschritts erhöhen können. Die Anwendung der Magnetseparation als in situ Separationsmethode und der Elektrofiltration als Proteinfractionierungstechnik wird in dieser Arbeit erörtert.
