

1. Record Nr.	UNINA9910346931503321
Autore	Trifu Adrian Ioan Alexandru
Titolo	Towards automated restructuring of object oriented systems
Pubbl/distr/stampa	KIT Scientific Publishing, 2008
ISBN	1000009204
Descrizione fisica	1 electronic resource (VIII, 176 p. p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The work introduces a method for diagnosing design flaws in object oriented systems, and finding meaningful refactorings to remove such flaws. The method is based on pairing up a structural pattern that is considered pathological (e.g. a code smell or anti-pattern) with a so called design context. The design context describes the design semantics associated to the pathological structure, and the desired strategic closure for that fragment. The process is tool supported and largely automated.
