

1. Record Nr.	UNINA9910346943703321
Autore	Haase Peter
Titolo	Semantic technologies for distributed information systems
Pubbl/distr/stampa	KIT Scientific Publishing, 2007
ISBN	1000005707
Descrizione fisica	1 online resource (XIV, 226 p. p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	In this book we show how semantic technologies and in particular the use of ontologies can be employed to address a number of typical challenges in distributed information systems: First, we illustrate how ontologies enable the integration of information across heterogeneous nodes. Second, we show how ontology evolution allows dealing with the dynamics in the information in a consistent manner. Third, we present a model for ontologybased coordination using semantic overlay networks.
